ENSURE THAT YOU CHECK THE CORRECT SIZE

join the 2 pages at the line

Use inches to verify your printout accuracy

Find Your Size

Place your heel along the solid line at the base of the chart. Place your weight on the foot that you are measuring and relax your toes. The line that touches your longest toe indicates your size. The shorter lines in between show half sizes. If you fall in between sizes, choose to fit the larger foot.

Check Your Width

When measuring your foot, align your instep (the center of the foot) with the solid instep line on the left side of the chart. If the outside of your right foot enters the grey Wide Width Zone, you should consider choosing a larger size or a wider width shoe alternative. Repeat the process with your left foot.

Note to Ladies

Ladies have a choice of both the ladies cutting as well as the unisex cutting. For a more snug fit, choose the ladies cutting. For a more relaxed fit, choose the unisex cutting. (Applicable only for Flips Bare. All Flips flip-flops are unisex cuttings.)
